Teacher's Day Celebration: By MCA Students

Teachers' Day is celebrated as a tribute to the valuable contribution made by teachers to the society by imparting knowledge and enlightening and shaping the career of students. It is said that "A good teacher is like a candle, it consumes itself to light up the way for others." When the nation paid tribute to the great teacher and educationist Dr. Sarvapalli Radha Krishnan, IMRD students of MCA also celebrated teacher's day with lots of enthusiasm and fun on 5th of September 2015.

On this occasion students gave a warm welcome by offering flowers and gifts to whole MCA staff, lab assistants and office staff.

The main purpose behind celebrating Teacher's Day was to make the teachers feel special about them. It was the time to appreciate all faculties for the efforts taken by them, to give shape to student's career and channelize student's knowledge to be utilized in the right way.

On this occasion all the faculties cut the cake brought by students. Teachers also participated in interactive games arranged by students. Students put up a grand entertainment program to show their deep love and affection for their teachers.

Assistant Director of IMRD Mr. Manoj Behere and whole MCA staff thanked students for the honor they shower on them to make it a special day for all of them.

Following is an Abstract of Ph.D Topic:

Abstract - Parsed Corpus is essential for various Natural Language Processing (NLP) activities, but its availability cannot be guaranteed for most of the languages. Furthermore development of parsed corpus or parser is not easy task. This is because success of these approaches almost invariably demands a huge amount of computational resources that are not typically available for most of the natural languages. Aim of the present research is to develop parsing schemes for natural language sentences. Parsing approaches viz. rule based or statistical, suffer from an inherent drawback that they typically lack a significant volume of computational resources. Languages lacking such computational resources are called “resource deficient” languages. Marathi language is one of the official languages in India, morphologically rich and free word order in nature. In this thesis, we propose a way of formulation of Marathi language grammar in Link Grammar formulation and parsing of such formulated grammar by using proposed Link Grammar Parsing Algorithm for Marathi.
